

PLEASE PLEASE PLEASE do not do anything that will lessen the current telephone privacy act in the state of Indiana. My telephone is for my use not for the numerous telemarketers and solicitors that we use to get calls from on a daily basis. We still get a couple a month but compared to the over 40 its wonderful. We can come home after a day of work and relax and not have to be bothered by those calls. I wish there was something that could be done to STOP the political calls that we received. In ONE day we received 3 calls from the republican party reminding us to go vote.
